Renewable and Non Renewable Resources What is Energy? Energy Types for Kids - Renewable and Non-Renewable Energy Sources What are Renewable and Non-Renewable Energy Resources Non-renewable energy Sources Of Energy - BKP | class 10 physics science neert cbse full explanation in hindi Energy Resources - IGCSE Physics Study Guide Nonrenewable Energy Resources

A nonrenewable source of energy is one that has a finite supply and once it is consumed it can not be replenished in a human lifetime. The rate of consumption of nonrenewable resources are becoming limited due to the fact that it is cheaper to produce and is readily available after the development of multiple processing facilities. Non Renewable sources are the primary source of energy being used worldwide.
